

Inflation Reduction Act

The Inflation Reduction Act touches upon almost every facet of the energy transition in an attempt to drastically reduce greenhouse gas emissions. Our lawyers have spent significant time analyzing the new law and addressing its impact on the energy industry, including in the areas below in which we regularly advise. To learn more, explore our [Inflation Reduction Act Resources](#) or reach out to a member of the Vinson & Elkins team for additional materials or to schedule a discussion on any of these topics.

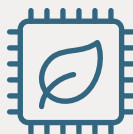

Technologies
